

dmc1

The Next Generation of Music/Communication Systems from M&S.

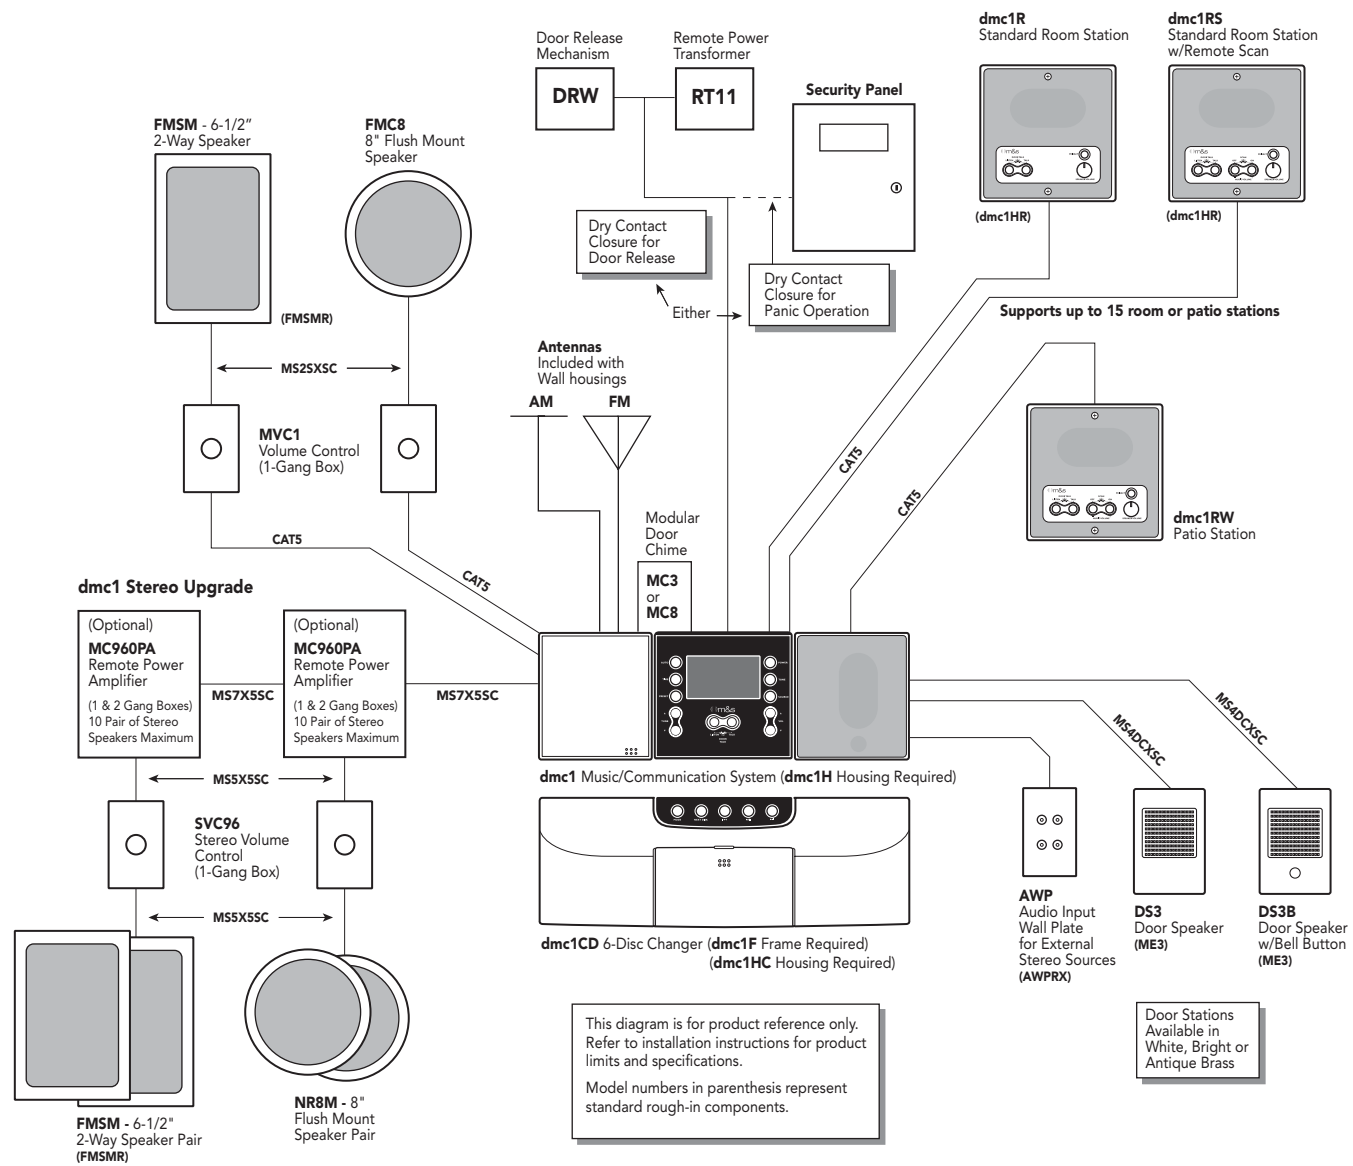

Designed for today's home, the dmc1 music/communication system offers the homeowner the peace of mind of being able to monitor what's going on inside and outside their home. Its elegant style is irresistible – although style is conveyed more convincingly by what you can't see. Updated to accommodate CAT5 wiring with quick connectors, the dmc1 was engineered with both the homeowner and installer in mind, by simplifying installation and improving performance. The dmc1 has an upgrade path to make it a stereo distributed audio system supporting up to 30 pairs of speakers in the home. By simply adding power amplifiers, your intercom becomes a stereo music source, delivering stereo music from the FM radio or optional CD player to any room in the home. All this in a 30 percent smaller package than our previous model!

The reduced size, refined appearance and technological advances combine to make the dmc1 a "crystal clear" choice for today's modern home.

System Specs

- Supports 15 room stations and 3 door speakers
- Frequency response: 20Hz - 20KHz
