Emergency Wall Communicator

Over 80% of falls occur in the bathroom or bedroom. The **Emergency Wall Communicator** can be mounted anywhere for added protection around your home.

Compatible with:

&

Package Contents: 1 EWC unit, 4 AAA batteries, screwdriver, 2 mounting screws, double-sided Velcro tape

Utilizes revolutionary two-way voice communication technology.

Simply push the HELP button to connect to family, friends, emergency 911 or your central station.

A combination of up to 4 wall communicators and/or pendants can be programmed to one base station.

Water resistant so it can be placed near the bathtub or shower.

Permanently mount with screws or double-sided tape.

Great for mounting next to the bed, in the bathroom or at the bottom of the stairs.

Protect yourself in the event of a fall even when you take your pendant off.

Easy to follow step-by-step instructions for programming to the base unit.
